Concise Explanation of Non-English Language Art Pursuant to 37 CFR 1.98

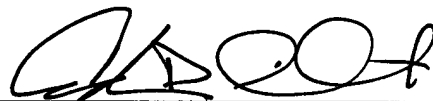

Applicant's previous Information Disclosure Statement listed three non-English language publications that did not include translations or a concise explanation of the relevance of the publications. Applicant currently resubmits these documents with the following explanation of relevance. Taiwanese publication number 84110989 and Japanese publication number 11-512809 (cited in the original IDS as 9-514224) are corresponding applications to PCT/US/13199, which was cited in the prior Information Disclosure Statement. The abstract for the PCT/US/13199 application states:

An automatic flush handle actuation apparatus includes an enclosure containing a drive mechanism and a self-contained power source for the drive mechanism. The apparatus also includes means for sensing use of the sanitary facility and means for interconnecting the drive mechanism and power source when the means for sensing detects a use of the sanitary facility. An adapter having first and second ends is included rigidly engaging the enclosure. A plunger pin slidably extends through the adapter engaging the drive mechanism within the enclosure at a first end. A threaded nut is provided around the adapter between the enclosure and a hub at an end of the adapter. The threaded nut, end of the adapter and an end of the plunger pin are constructed to work with the flush mechanism in a manner substantially identical to a manually activated flush handle.

Taiwanese Publication No. 84110990 discloses a similar device. However, the device disclosed in Taiwanese Publication No. 84110990 functions by actuating the handle. As a result, the handle does not need to be removed prior to attaching the flushing device.

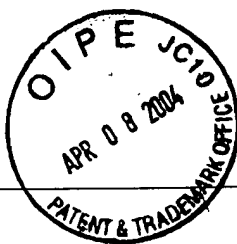

Applicant respectfully request that the listed documents be made of record in the present case.

Respectfully submitted,

Adam D. Airhart
